IDENTIFIERS	*Maryland

ABSTRACT

This report presents 44 tables detailing the retention and graduation patterns, by institution, of first-time, full-time students at Maryland's public four-year colleges and universities, from 1977 to 1996 . Specifically, it looks at the number and percent of students retained at their original public four-year campus or who graduated from any senior public college or university in the state. Highlights include: (1) the second-year retention rate has increased since 1977, with 80 percent of new full-time students in the entering class of 1996 re-enrolled at their institution, compared to 71 percent in the 1977 cohort; (2) although a gap persists in second-year retention rates between all students and African Americans, this gap continues to decline and there was a difference of only 4 percent in the entering class of 1996; (3) the 6-year graduation rate for the most recent cohort was 55 percent, the lowest in 5 years; (4) the 6-year graduation rate of African American students who matriculated in 1991, was 40 percent, the highest yet; and (5) females were more likely to persist from freshman to sophomore year than males and also had a higher 6-year graduation rate (60 percent compared to 49 percent for males). Highlights of Retention and Graduation Rates at Maryland Public Four-Year Institutions

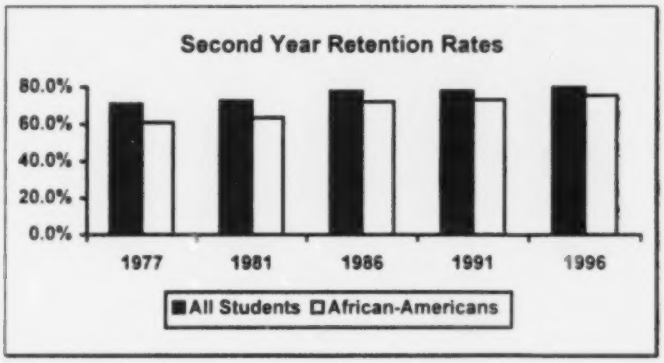
This report contains the retention and graduation patterns of first-time, full-time students at Maryland's public four year colleges and universities from 1977 to 1996. Specifically, it looks at the number and percentage of students who were retained at their original public four-year campus and those who graduated from any senior public college or university in the State.

Some highlights:

- The second-year retention rates of new full-time freshmen, measured by the percentage of those returning to their original campus after one year, has increased since 1977. Eighty percent of new full-time students in the entering class of 1996 reenrolled at their institution. In comparison, only 71 percent of students in the 1977 cohort returned for their sophomore year.

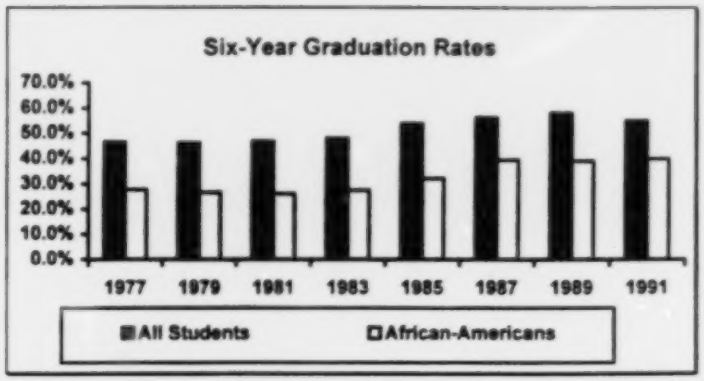
- The same pattern emerged among first-time, full-time African-Americans enrolled at Maryland public four-year institutions. Second year retention rates for African Americans rose from 61 percent in 1977 to 76 percent for the class of 1996. Although a gap persists in second year retention rates between all students and African-Americans, this gap continues to decline. For the entering class of 1996, the gap was just four percentage points.



- The six-year graduation rates for the most recent cohort of new full-time students (55 percent) was the lowest rate in five years. This figure, however, is still well above the graduation rate of 47 percent attained by the entering class of 1977.

- The four-year public institutions with the highest six-year graduation rates for the entering class of 1991 were St. Mary's (81 percent), Salisbury (65 percent), UMCP (63 percent). Towson (61 percent), and Frostburg (60 percent).

- The six-year graduation rate of African-American students who matriculated in 1991 is 40 percent -- the **highest** figure since the Commission began tracking these statistics. Although the six-year graduation rates of full-time African-American four-year public students have consistently lagged behind that of all students, this gap has narrowed since 1977 when only 28 percent of African-American students graduated.



- The six-year graduation rates of the most recent cohort of African-American full-time freshmen continues to improve at historically black institutions. The six-year graduation rate for Bowie (39 percent), Morgan (37 percent) and Coppin (27 percent), are **the highest** since 1977. The six-year graduation rate at the University of Maryland Eastern Shore was 36 percent, the highest figure since 1989.

- The four-year public institutions which had the greatest six-year graduation rates among African-Americans in the 1991 cohort were St. Mary's (72 percent), UMBC (60 percent), Towson (53 percent), and Frostburg (50 percent). **The six-year graduation rates of African-American students exceeded those of whites at UMBC.** Salisbury has the largest gap between the graduation rates of African-Americans and all students of any public four-year institution in Maryland.

- Females are more likely to persist from their freshman to sophomore year than males. A similar pattern emerged among the six-year graduation rates of female and male students. The six-year graduation rates of male full-time freshmen have consistently lagged behind those of female students. The six-year graduation rates of female students for the entering class of 1991 was 60 percent. In comparison, just 49 percent of male students in the 1991 cohort graduated in six years.
